

Winter Wonderland Craft Fair 2018

Craft Categories

Keep this as a reference guide when filling out the show application.

We have tried our best to list everything but with continually changing craft mediums we are bound to leave out something. Keep in mind when filling out your show applications that the **primary** category listed should be your **primary** craft (what you have the most of/focus on).

This category is generally what the show directors use to determine placement at a show. If your second category ends up being the primary craft, you may find yourself too close to someone who sells a similar type product. Jewelry is the most common category and often fills very quickly. If you sell jewelry of any kind you need to list it as a category. For example: Your primary craft may be Clay; but you sell a few pieces of clay jewelry along with your clay pots, you will need to list jewelry as a category.

Listing the correct categories you will be selling at the show is beneficial to everyone. Your show application is all the show director has to determine where to place you at a show. It is our policy to limit any category to 10% of the show and the correct categorization of your work helps us maintain an equitable balance. If you have any questions about what category your product falls under please call or email the show director for clarification.
