

WEEK 5: September 25th
Meet a Falconer

Rush Pavilion
Ages 10 - 14

This week is for the birds! We will be discussing the master of adaptation; the owl. Students will inspect real owl wings and talons and then dissect owl pellets! We will take a short hike down to the lake to use our binoculars to see what birds we can see and hear before welcoming two Falconers and their beautiful birds of prey. They will chat with us about what it takes to be a falconer and about the birds they bring.
