Interactive Trail Map
Home Screen Shortcut: iOS

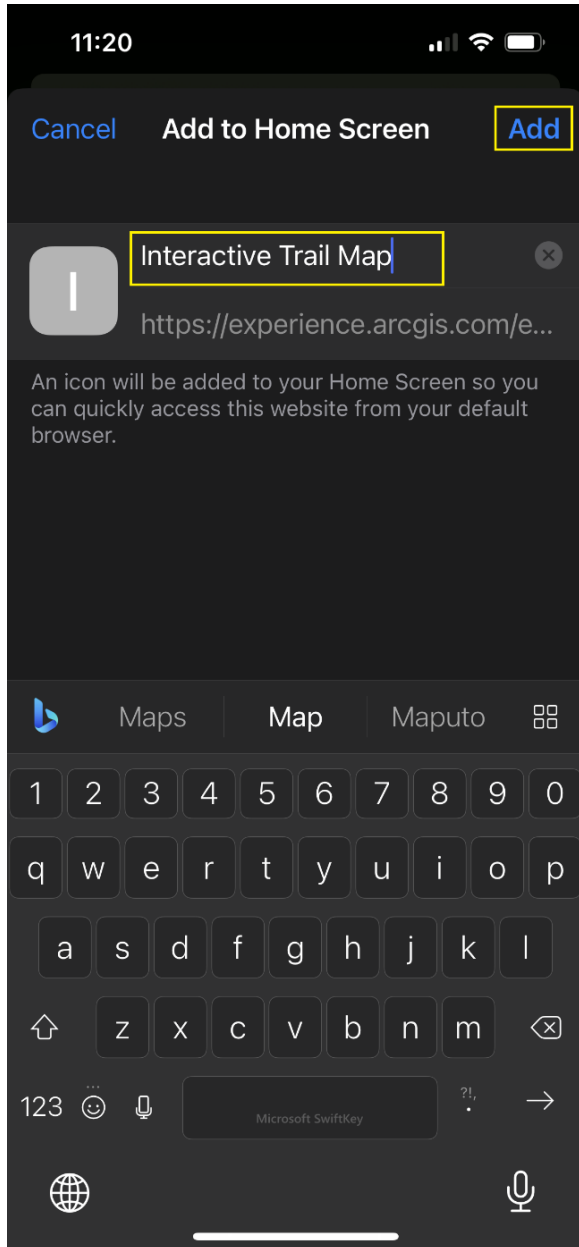

1. Scan the QR Code and select the pop-up link to access the **Interactive Trail Map**. Once the map has loaded, click the share icon, highlighted in the yellow box below.

2. Select 'Add to Home Screen.'

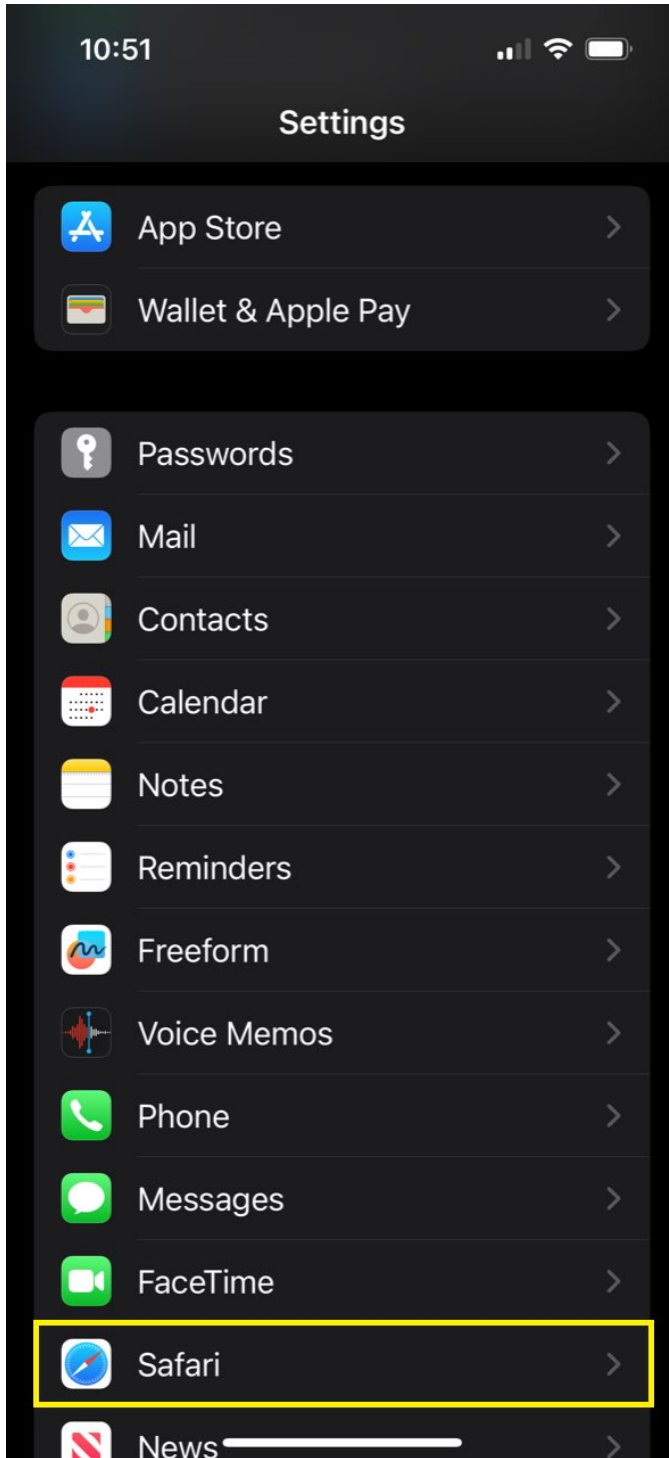

3. You can change the title of the shortcut from the default 'Interactive Trail Map' if desired. Once complete, click 'Add.'

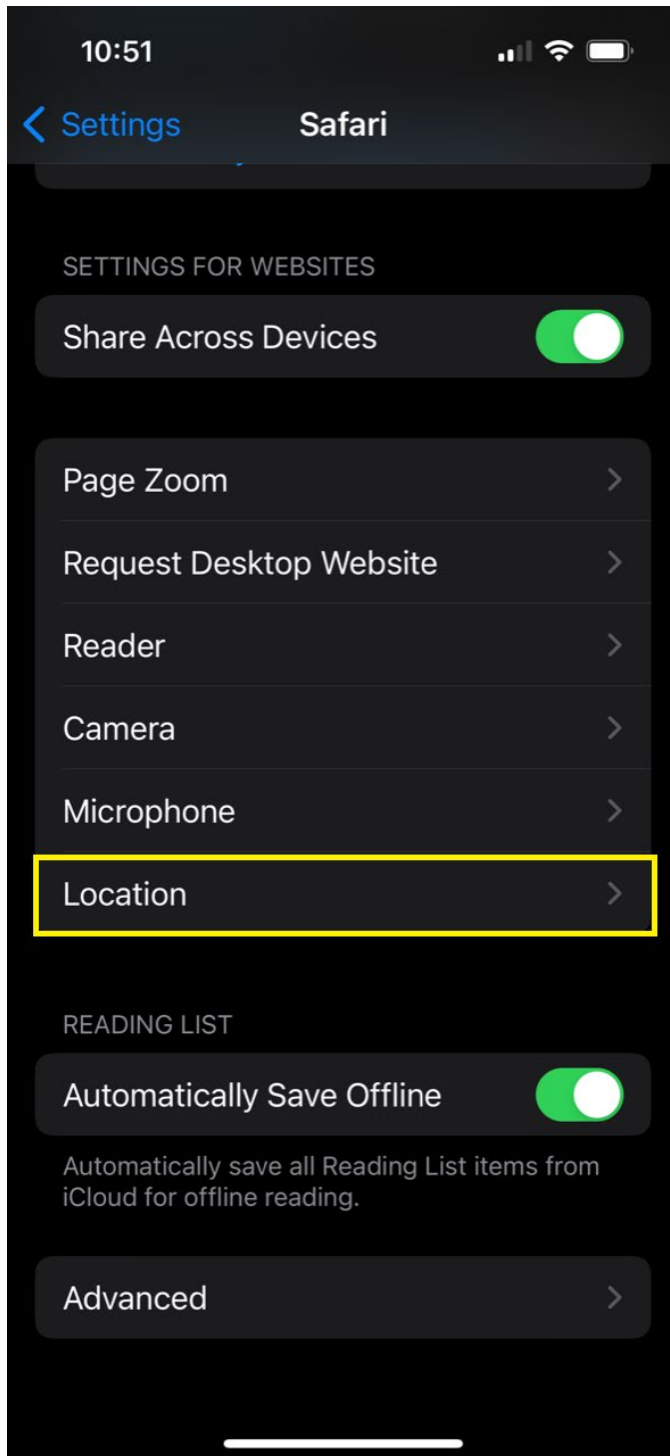

4. The new shortcut will appear on your home screen. Going forward, use this shortcut to access the Interactive Trail Map. Below is a screen shot of a home screen showing the shortcut.

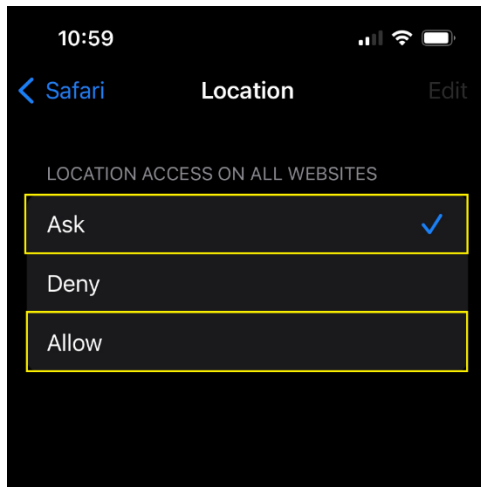

5. It may also be necessary to complete similar steps for Safari. To do so, navigate to the main 'Settings' page for iOS and scroll down to 'Safari.'

6. From there scroll down and select 'Location.'

7. Ensure that either 'Ask' or 'Allow' are selected.

8. At this point, when you open the **Interactive Trail Map link**, your device will prompt you to allow location access or automatically load your location, depending on your choices above.
9. If you continue to experience location issues, it is recommended to clear your website data and history. To do this, go to the main '**Settings**' page for iOS and scroll down to '**Safari.**' From there scroll down to '**Clear History and Website Data.**' This will clear the cache for Safari; repeat the steps above. *Please be aware that clearing the cache will log you out of sites that you are currently signed into in Safari.*
