

Interactive Trail Map Location Troubleshooting: Android

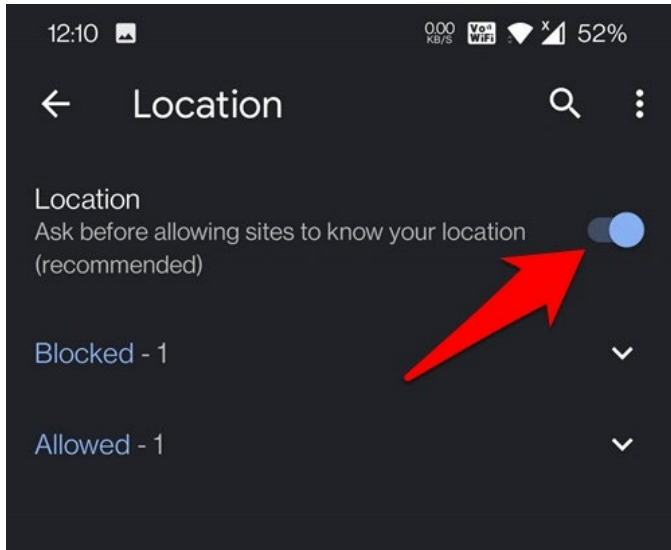

1. Launch the [Chrome browser](#) on your Android device. Tap on the **More**  options icon and select the 'Settings' menu.

2. Scroll to the *Advanced* section, and tap on 'Site Settings.'

3. Enable or disable the 'Location' toggle button to allow or block the request.

4. Expand the 'Blocked' sites listed below the 'Location' toggle. If you see a link with 'arcgis' click the link. A window will appear allowing you to grant access to that site.
